## WORK EXPERIENCE:

### DOCTOR AND PATIENT APPLICATION. BLUEROAD TECHNOLOGIES PRIVATE LIMITED.PUNE

06/2023 - Present

Noida. UP

#### Achievements/Tasks

- Developed a fully dynamic and interactive application for managing consultations between doctors and patients, supporting both virtual and in-clinic modes.
- Utilized React JS, TypeScript, and Redux for robust state management and data flow, integrating Redux-Saga and Redux-Toolkit.
- Designed the interface with Material-UI and custom CSS for a modern, user-friendly experience.
- Integrated multiple APIs with Axios to ensure seamless backend communication.
- Implemented efficient pagination for handling large datasets and created reusable components to enhance maintainability.

### E-Commerce website Project: BLUEROAD TECHNOLOGIES PRIVATE LIMITED.PUNE

06/2023 - Present

Noida.UP

#### Achievements/Tasks

- Developed using React.js, CSS, Tailwind, and Redux for state management.
- Ensured robust and responsive user experiences through dynamic and interactive interfaces.
- Designed and styled the application with Material-UI and custom CSS, ensuring a modern and user-friendly interface.
- Integrated several APIs using Axios to facilitate smooth communication with backend servers.
- Implemented pagination for handling large datasets efficiently.
- Created reusable components, including a header component, to minimize redundancy and enhance maintainability.
- Employed React-Router-Dom for intuitive client-side routing and improved application usability.
- Worked on dynamic tab and column management, allowing the admin to easily add and update content.

### SOFTWARE TESTER(MANUAL TESTING): BLUEROAD TECHNOLOGIES PRIVATE LIMITED.PUNE

06/2023 - Present

Noida.UP

#### Achievements/Tasks

- Conducted thorough manual testing to validate software functionality and performance.
- Developed comprehensive test plans and cases to enhance testing efficiency and coverage.
- Identified, documented, and reported bugs, working closely with the development team to resolve issues.

## PERSONAL PROJECTS

### Portfolio Project:

- Designed and implemented a fully responsive e-commerce platform using React.js and Vite, featuring a shopping cart, user authentication, and product management.
- Created an interactive product showcase website with HTML, CSS, and JavaScript, emphasizing a visually appealing design and performance optimization.
- Developed a web-based order management system with React.js, including features such as order tracking, inventory management, and customer support.
- Converted an existing desktop-only e-commerce website to a fully responsive design, enhancing compatibility with various devices and optimizing load times and user interaction.

### Flipkart Clone Project:

- Designed and implemented a fully responsive e-commerce platform using React.js and Vite, including features like shopping cart, user authentication, and product management.
- Created an interactive product showcase website with HTML, CSS, and JavaScript, focusing on visually appealing design and performance optimization.
- Developed a web-based order management system using React.js, incorporating functionalities such as order tracking, inventory management, and customer support.
- Converted an existing desktop-only e-commerce website to a fully responsive design, improving device compatibility, load times, and user interaction.
